SUPER ALL WHEEL CONTROL

Complete control in any road condition

S-AWC is Mitsubishi Motors' full-time, 4WD-based integrated vehicle dynamics control system that optimises driving and braking power at each wheel for more power, better cornering, and better stability in any driving condition.

(Paved roads)

SNOW Mode
(Snow-covered roads)

GRAVEL Mode
(Rough roads)

- S-AWC is a driver support system that assists the driver with braking and driving operations. As with vehicles without this system, safe driving is required such as decelerating before entering a curve. The driver is always responsible for safe and attentive driving.
- When driving on snow-covered roads, please make sure to use winter tyres.

Open the door and take a seat—it's the moment the enjoyment starts. The moment you notice its purposeful design and feel the refinement with your fingertips. It's from here you boldly start each day.

Empowering, spirit-lifting design.

The ECLIPSE CROSS features a stylish, cockpit-like interior design. The horizontally laid out instrument panel flows dynamically with meticulously designed silver accents and refined materials.
